# ORIGIN

# NEW ORIGIN A2 MILK

## WHAT MAKES ORIGIN SO UNIQUE?

A2 milk harkens back to the way milk used to be natural & human intervention caused cows to develop A1 proteins in their milk. All other mammals produce A2 milk, including humans, which means A2 milk could offer a closer experience to drinking the milk that humans are "supposed" to have. The difference between the milk protein in A1 and A2 milk is only one amino acid – but this little difference potentially impacts how our bodies digest the milk. With its natural golden color and amazing nutritional benefits, A2 milk is the way milk should look, taste and be enjoyed – as nature originally intended.

**ABOUT VERMONT SALUMI**

Vermont Salumi is an artisan producer of all-natural meat products rooted in Italian tradition and the classic salumificio. They prioritize clarity of flavor based on simple ingredients and time-honored craftsmanship.

**Mission:** Vermont Salumi's mission is to produce great food with classic flavors at a reasonable price. They believe simple ingredients and careful craftsmanship is what makes food great. They always start with antibiotic-free pork because it is healthier for you and it is the right thing to do. They make products that start good conversations, reward you at the end of a hard day, and fuel your active family. As their number one ingredient, it is important to get the right pork - they only work with farmers who raise pigs that are antibiotic-free and fed a 100% vegetarian diet.

**The Story:** Peter Roscini Colman grew up on an organic farm in Vermont and spent summers in Umbria with his babbo's family. There, he used to "warm up" for lunch at his grandparents' house by pounding prosciutto. A lot of prosciutto. He loved it so much he decided he wanted to learn to make it himself. Soon, he was apprenticing with the norcini, the famed butchers of Umbria, who taught him the methods, techniques, and centuries-old traditions of salumi-making.
