

# ORGANIC MARKET NEWS

SEPTEMBER 16 - SEPTEMBER 23, 2022

## ORGANIC HARD SQUASH SEASON

Pennsylvania organic growers are in peak season with their local **Organic Hard Squash**.

The late summer and early fall harvest is a week or two ahead of typical timing and so far quality is excellent, though some scarring is completely normal on **Organic Spaghetti Squash**.

In stock now:

- **OG Green Acorn Squash**
- **OG Butternut Squash**
- **OG Delicata Squash**
- **OG Honeynut Squash**
- **OG Kabocha Squash**
- **OG Pie Pumpkins**
- **OG Spaghetti Squash**

### OG BROCCOLI & CAULIFLOWER

**Organic Broccoli** and **Cauliflower** from California are improving in supply during mid-September. Early September brought elevated prices and limited supply as quality suffered, inhibiting growers to harvest on normal schedule. Late September will bring improved supply and stronger quality, but pricing will be a gradual improvement over a few weeks as it will take time to full the supply change after extended limited supplies.

Quebec grown **Organic Broccoli** remains available and supply volume is improving after lighter volumes due to extra demand from California. Quebec supply of **Organic Cauliflower** remains limited or unavailable, but strong supplies are expected in early October.

### OG BERRIES

**Organic Raspberry** prices are expected to begin easing off as supplies begin to increase. Most product continues to come out of California and quality has been excellent. Mexico is also harvesting good supplies and quality has been excellent as well.

**Organic Strawberry** prices are coming down as production has increased due to the recent CA heatwave. Quality has improved and has looked very nice on the latest inbounds. Supplies should be good.

**Organic Blueberry** prices remain steady out of Peru. Quality has been excellent, and supplies are plentiful. There is still Pacific Northwest fruit available from Washington, Oregon, and California coming in as well. Quality has been nice.

**Organic Blackberry** prices remain steady out of California. Quality has been very nice with steady supplies. Mexico harvests are expected to begin by early October.

### OG APPLES & PEARS

New crop **Organic Gala Apples** out of Washington are in great supply on all sizes and packs. We are seeing some excellent quality.

New crop early Washington **Organic Honeycrisp Apples** are available, though in modest supply for September, and light fruit color. Growers expect to see better color and supplies as we move through October.

Import **Organic Fuji Apples** are expected to run out by the end of September and then gap for 2-3 weeks before new crop begins in October.

**Organic Asian, Bartlett, Bosc, and Starkrimson Red Pears** out of CA and WA are in good supply. Quality is excellent!

The first Washington **Organic Anjou Pears** are expected to arrive early October.

## OG WARM VEG

**Organic Zucchini and Cucumbers** from Lady Moon's Florida farm has begun harvest in September and volumes are growing quickly. Promotional opportunities will present themselves in early October with increasing volumes.

**Organic Eggplant, Green Bell Peppers, Jalapeño Peppers, and Zucchini** from Lady Moon Farms PA and other local growers have finished for the season. North Carolina production of these commodities and **Organic Yellow Squash** have begun in a limited fashion and are expected to increase as October approaches.

## OG TOMATOES

Local PA **Organic Grape and Cherry Tomatoes** from Lady Moon Farms are expected to be available into the end of September. Lady Moon will be back into production in Florida by mid-October, so there will be a 2-3 week gap between their PA and FL crops on snacking tomatoes.

Local **Organic Vine Ripe and Roma Tomatoes** from Lancaster County, PA continue to be available, but supplies are expected to start to decline headed into October.

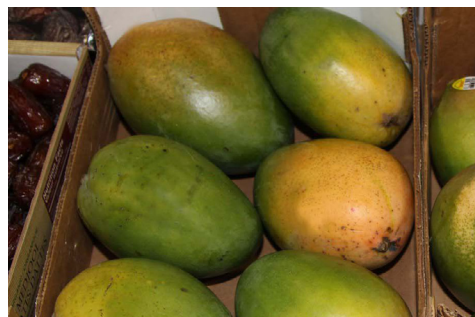

15lb **Organic Beefsteak Tomatoes** will be available from Ohio hoophouse field production for mid-September.

## OG MELONS

**Organic Mini Watermelons** will be available out of CA again. The PA and local harvests are all finished, but CA quality has been outstanding, and supplies are steady.

**NOTE:** **Organic Cantaloupes and Honeydew** are slowly finishing in the California deal with some growers finished up already. Supply will get tight as we may be finished in early October.

## OG MANGOS

**Organic Mangos** are in steady supply from Mexico, but this will change as we head into October. We currently have beautiful Non-hot Water Treated (NHWT) fruit in 6ct and 8ct, with many more on the road. Quality is very nice on this extra-large fruit.

**NOTE:** Sizing has just been very large with very minimal 8ct, 9ct, and 10ct.

## OG GRAPES

**Organic Green and Red Seedless Grapes** are in peak season from California with promo pricing and good quality on newer varieties. Promote through mid-October.

Marian Farms **Biodynamic Thompson Grapes**, in paper totes, are in season in limited availability.

## OG PEPPERS

**NOTE:** **Organic Color Bell Peppers** from Holland and Canada experienced a slight rebound for a week of production in mid-September before volumes begin to drop once again. Late

September is expected to have extremely limited supplies and increased prices. Quality is not expected to suffer, however overall volume will be significantly down.

## OG LOCAL GREENS

**Local Organic Greens** from Lady Moon Farms in Chambersburg, PA are in their peak fall season. Harvest began in early September and will continue until mid-October. Promotional opportunities on **Organic Green Kale** will be available in late September.

## OG BEETS

**ALERT!** **Organic Bunched Beets** from California remain in very limited supply during mid-September, but production is expected to improve some as October approaches. Pricing will improve gradually as supply volume does.

## OG BOK CHOY

**Organic Bok Choy and Baby Bok Choy** have begun harvesting for the late season local production. Expect supplies from PA and NJ into early October.

## OG GREENHOUSE CUCUMBERS

**NOTE:** Organic Euro and Mini Seedless Cucumbers will remain tight as many shippers are in crop transition. This market is expected to stay tight until the end of September. Quality is excellent.

## OG BRUSSELS SPROUTS

**NOTE:** Organic Brussels Sprouts from Mexico are resuming harvests in late September. Early season quality will be so-so and volumes will remain light, but as mid-October approaches, both are expected to show signs of improvement.

## OG ASPARAGUS

Organic Asparagus are on the high side for September. Organic Asparagus from Argentina has started their new and short season crop, but product is very expensive. Quality has been great, though.

## OG TROPICALS

Organic Hass Avocados are in steady supply from Mexico and should remain promotable heading into October.

Organic Magenta Dragon Fruit is in very short supply and will be limited.

Organic White Dragon Fruit is in excellent supply, and we'll have good volumes as we close out September. Organic Dragon Fruit is actually in better supply than conventional, and it's priced to move. Quality is very nice.

Organic Pineapples are in better supply for the third the week of September. We're carrying both 6t and 8ct, with more on the way.

## OG LETTUCE

**ALERT!** Organic Red and Green Leaf, Romaine Lettuce, Romaine Hearts, and Iceberg Lettuces from California continue to struggle in late September as the field "INSV" disease continues to cripple yields across this commodity group. INSV, which causes leaf items to wilt and die in the field before full maturity, is expected to continue through October.

As the season continues, expectations have grown that production is likely to not improve until the desert season in November. Prepare for limited supplies and elevated prices for the foreseeable future.

Organic Lettuce production from Quebec remains in steady availability and strong quality to supplement shortages from the West Coast.

## OG LEMONS

Organic Lemons out of Argentina are available in modest volume. Mexico is starting up and is seeing very limited supplies and peaking on 140ct and smaller fruit. Things should improve around in a couple weeks as Mexico should start to see larger fruit and California will start producing, adding to the supply. The crop is expected to be of good size so once things start going at full speed it should be a good season.

**NOTE:** Organic Grapefruit out of California continue to be limited due to all the heat and lack of rain. Expect seasonal quality.

**NOTE:** Mexican Organic Limes continue to be a struggle with very small fruit prevailing.

## OG KIWIBERRIES

Organic Kiwiberries are coming back into season for late September and early October from Oregon. Promote these seasonal eat-whole tasty fruits in your berry section.

## OG FIGS

Organic Fresh Figs continue in season with three varietals: Black Mission, Brown Turkey, and Green Sierra.

## OG SPECIALTY VEG

Organic Okra, Shallots, and Tomatillos are in season from Coke Farms in California.

Organic White Sunchokes are in season from local PA farms.

# THANK YOU

to all who helped us support Make-A-Wish at the  
2022 Four Seasons Family of Companies Golf Outing!

# HOMEGROWN ORGANIC FARMS GRAPE DISPLAY CONTEST

## SEPTEMBER 19 - OCTOBER 8, 2022

Extra, extra read, all about!!! Want to hear some really "grape" news? It's time for yet another super fun, volume driving display contest brought to you by Four Seasons Produce and Homegrown Organic Farms!! This exciting contest is all about one of the highest tonnage items in the produce department today, and that's grapes! Fruit quality, color and flavor have been outstanding this year and we are headed full steam into later season California fruit, which are some of the best tasting grapes of the season! These are great formulas for happy customers and added sales and profits for your departments!

### CONTEST CRITERIA:

- Build a "grape" looking display in your department using Organic Homegrown label grapes. ALL fruit MUST be purchased from Four Seasons Produce.
- Displays must contain both red and green grapes from Homegrown Organic Farms. Black grapes are NOT required for this contest but do add a full variety of flavors to your grape sets, as long as its Homegrown Organics fruit. Please check with your Four Seasons sales rep or merchandiser for availability of black grapes from Homegrown Farms.

#### Grape Codes:

- 43878 - OG Homegrown Red Grapes
- 43885 - OG Homegrown Green Grapes
- 232602 - Preformed Empty Display Box

- Must purchase a total of 6 cases of each color (red and green) during the contest period.
- Displays must show the Homegrown Organic Farms labeling and brand.
- All displays must remain up for one week.
- Send all display photos to [contests@fsproduce.com](mailto:contests@fsproduce.com) by Friday, October 14, 2022.

### LARGEST DISPLAY

**1<sup>ST</sup> - \$400 gift card**  
**2<sup>ND</sup> - \$300 gift card**  
**3<sup>RD</sup> - \$200 gift card**

### MOST CREATIVE

**1<sup>ST</sup> - \$400 gift card**  
**2<sup>ND</sup> - \$300 gift card**  
**3<sup>RD</sup> - \$200 gift card**

### BEST SMALL STORE

*3 registers or less*

**1<sup>ST</sup> - \$400 gift card**  
**2<sup>ND</sup> - \$300 gift card**  
**3<sup>RD</sup> - \$200 gift card**

**Every qualified entry** will receive a Four Seasons Produce/Homegrown Organic Farms Wine Tumbler and Bottle opener combo set! So everyone is a winner with this SUPER sweet entry prize!

Time to get your grape on and build some fantastic displays of Homegrown Organic Farms Grapes!  
Talk with your Four Seasons Sales Rep or Merchandiser for display tips and ideas!

# GUIDE TO HARD SQUASH

## ACORN/GOLDEN ACORN

- Small and round like an acorn
- Sweet, slightly nutty vegetable flavored flesh
- Dark green skin, patched with orange
- Packed with fiber

## GOLDEN NUGGET

- Looks like a small pumpkin
- Sweet, orange flesh

## BLUE/GOLDEN HUBBARD

- Very hard skin
- Great for pie filling
- Excellent shelf life

## HONEYNUT

- Like a mini-sized butternut
- Flesh is much sweeter and has more squash flavor than butternut

## BUTTERCUP & KABOCHA

- Green skin
- Sweet & creamy orange flesh
- Kabocha aka "Japanese Pumpkin"

## RED KURI

- Japanese variety
- Orange exterior, yellow flesh
- Nutty & sweet

## BUTTERNUT

- Most popular hard squash variety
- Orange flesh
- Versatile in cooking, roasting
- Ideal blended for soup

## SPAGHETTI

- Mild & sweet flavor
- Flesh comes out like pasta strands when cooked - hence the name

## CARNIVAL

- Pale, orange flesh
- Relative of Acorn & Sweet Dumpling

## SWEET DUMPLING

- Mildly sweet
- Tender, orange flesh

## DELICATA

- Yellow flesh
- Tastes like a sweet potato
- Edible shell - no peeling needed!

## TURBAN

- Gets its name from its unique shape
- Use as decoration, soup bowl, or a floral arrangement

# CONVENTIONAL MARKET NEWS

SEPTEMBER 16 - SEPTEMBER 23, 2022

## SEPTEMBER APPLE UPDATE

Eastern **Honeycrisp**, **McIntosh**, **Ginger Gold**, and **Red Delicious Apples** are now available and arriving in normal timing. In late September, **Cortland**, **Empire**, **Golden Delicious**, **Rome**, and **Snap Dragon Apples** will be available.

Four Seasons is pleased to offer NY and PA Eastern **Apples** in 3lb poly bags and 8/~4lb totes, plus bulk try packs from our PA and NY partners at Hess Brothers Fruit and Hudson River Fruit.

All the previous weather events over the last 1-2 years seem to be causing a very late start to the Washington **Apple** season, with most varieties starting or expected to start 2-4 weeks later than original estimates. Growers are once again calling for a smaller crop, causing some varieties to be firmer than desirable. A smaller crop usually allows for bigger fruit, but we will need to wait and see how everything shakes out.

Michigan is expecting a bumper crop and the NY/PA Eastern supply looks like it is in good shape. There will be a good supply of Apples to sell.

Premium new crop **Gold Delicious Apples** are expected to begin out of Washington in late September. We expect to transition out of **Ginger Golds** and into **Golden Delicious Apples**.

2022 fresh **Granny Smith Apples** out of Washington should begin in late September with high demand out of the gate. Eastern fruit is not expected until late October.

### CV STRAWBERRIES

**Strawberries** are very promotable. The California heatwave has increased production and the harvests all flushed together. Expected promotable prices with strong volume available. Quality is nice as it has improved from previous weeks

**Blackberry** prices remain steady. Most production continues to come in from California and quality has been nice. Mexico is lightly starting, and more production is expected in the beginning of October.

**Blueberry** prices are easing as demand has softened. Supplies from Peru are beginning to increase as more vessels begin to arrive. Quality has been outstanding with excellent size and flavor. Mexico production is beginning very lightly but expect more availability in October.

**Raspberry** prices are continuing to ease off as production is beginning to increase from CA and Mexico. Quality has been excellent from both regions.

### CV TOMATOES

**Roma Tomatoes** are very promotable as we head into the end September. Supplies will remain steady.

**Specialty Snacking Tomatoes** from NatureSweet will be promotable through September and into October with promotions of different varieties. Availability is excellent and quality has been superb on all inbound.

Local **Grape Tomatoes** continue in season out of PA. Quality has been outstanding. Availability has started to decline and will probably clean up by late September.

**NOTE:** Local **Vine Ripe Tomato** prices have increased and will continue to do so into the end of September. Quality has been outstanding from DE, NJ, and PA. With the heat really bringing on production, this could cause increased pricing and a gap in product for late September. Availability is expected to start to decline from now until October.

### CV PEPPERS

**Green Peppers** will be promotable as we head into late September. There is a lot of quality jumbo fruit out there and shippers are looking to deal. We will continue to source product from local NJ, DE, and PA growers. Quality has been excellent!

11lb **Color Bell Pepper** prices are promotable for the **Yellow** and **Orange** as Canada is flushing, and Mexico is coming into the market. **Red Bells** are priced higher than the other colors.

15lb **Elongated Red Sweet Pepper** picks are steady but California is not expecting larger volume until the end of September, and this keeps getting pushed back. Quality is excellent

**Mini Mix Sweet Peppers** will remain steady into the end of September with new fields starting and Canada coming into their new crop as well. Quality has been excellent.

## CV FALL ORNAMENTALS

Local PA **Pumpkins** and **Ornamentals** are looking great! The heat has brought on crops early, so expect good supplies early on but they could come to a hard stop later in the season the middle of October on many varieties.

**Face Pumpkins** are expected to be plentiful this year from PA farms. **Heirloom/Specialty Pumpkins** may end early in October.

## CV GRAPES

**Green Seedless Grapes** are still in great supply with quite a price spread. We have had excellent quality "Stella Bella," "Sweet Globe," and "Milano," and "Green Emerald" from Pretty Lady on **Greens**.

**Red Seedless Grapes** continue to be excellent quality as the market settles as we transition into better crop varieties – "Sweet Celebration," "Scarlett Royal," "Holiday Red," and "Krissy."

## CV MELONS

**Watermelons** are steady. Harvests continue to come from DE and NC, and quality has been excellent. Supplies will remain steady in bins and cartons.

**Cantaloupes** have increased in price with volume remaining steady.

**NOTE: Honeydew** is tight due to limited plantings, so look for light supply going forward. We will be ending our **Specialty Melon** season as many growers have finished up.

## CV PEARS

**Bartlett and Starkrimson Red Pears** are in peak season from Washington.

**Bosc Pears** are winding down out of California and are expected to begin out of Washington in the first week of October. We may have a small gap between regions before the Washington fruit begins.

## CV STONE FRUIT

**Stone Fruit** is winding down for the season and should finish by the end of September, with **Yellow-flesh Nectarines** and **Peaches** going longer than **White-flesh. Plums** and **Pluots** are around with late season varieties.

**Cherries** have finished for the season out of the Pacific Northwest. We expect a gap until new imports out of Chile and Argentina are available in November.

## CV SQUASH

**Green and Yellow Squash** from PA, NJ, and DE will continue to arrive with outstanding quality. Prices are very promotable as new fields are increasing in production for the end of September.

**Acorn, Butternut, and Spaghetti Squashes** are in peak season from local PA farms.

## CV EGGPLANT

Local **Eggplant** will remain abundant as we are seeing promotable pricing with local product out of NJ and PA. Quality has been excellent, and there is plenty of volume.

## CV SWEET CORN

We will be cleaning up on local **Sweet Corn** by the end of September.

Some fields are finished and drying up from the heat. Quality has been excellent.

## CV ASPARAGUS

**Asparagus** prices are expected to decline as more product comes into the market from new fields in Peru and Mexico. Quality has been good.

## CV BROCCOLI

**Broccoli Crowns** are readily available from Eastern and Western growers. Pricing is average.

PA local **Bin Stem Broccoli** is almost ready! The first harvest showed QC issues from the heavy rains in early September, but better harvests are coming.

## CV CAULIFLOWER

**Cauliflower** quality is great for the most part, but prices have settled in for September at modest levels.

Limited local **Bin Jacket-cut Cauliflower** is ready now. Local product should be flowing in steadily by October from PA farms.

## CV LETTUCE

**ALERT!** Heat and "INSV" disease have taken its toll on California **Lettuces**. Prices remain on the higher side with quality arriving mediocre. CA expects to be in this predicament until they transition down south.

Quebec has been experiencing gaps, keeping the prices on the higher end, yet still are less than California.

## CV CUCUMBERS

**Super Select Cucumber** prices are expected to remain steady into the end of September. Local product started into their second plantings. There is product coming out of NJ and PA. Quality is outstanding in the new fields.

**NOTE: Mini Seedless Cucumbers** are tight and are expected to be this way into the last week September. Many shippers are seeing minimal availability from their crops. There are some shippers that are flushing but product is not being trayed up. Quality and availability have been excellent.

**NOTE: Euro Seedless Cucumbers** are expected to remain limited for the end of September as shippers out of Canada will start to flush again by October. We are seeing some excellent quality.

## CV CITRUS

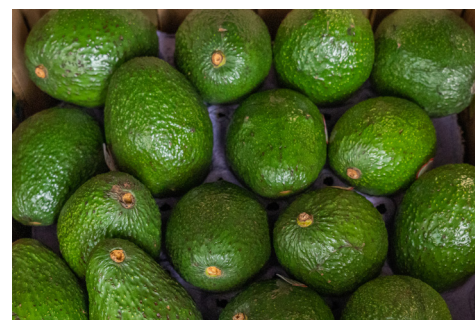

Import **Mandarins** are in great supply with outstanding quality, but we will see prices slowly creep up. We are in "W Murcotts" variety mainly out of Chile, while Peru is winding down.

The **Grapefruit** crop has transitioned into "Summer Rubies". Smaller fruit is tight. New crop Florida **Grapefruit** will start at the end of September. Texas **Grapefruit** will start in mid- October.

**Lemons** remain in good supply, peaking on 115/140sz with fancy fruit getting tight. Yuma, AZ and Thermal, CA looks to start in late September with peak sizes 115/140/165sz. This crop volume will be like last year and ship through February. The import **Lemon** deal is slowly fading as large fruit is very hard to come by although Mexico is in decent supply and will be better once weather breaks.

**NOTE: Limes** will continue to remain high priced, mixed with par quality on fruit from Mexico. Many growers are transitioning into new summer crops.

**Navel Oranges** continue with outstanding quality on imported fruit. All sizes are in good supply for the month of September. New crop California **Navel Oranges** should start at the end of October, pending on color. Look for new crop **Juice Oranges** from FL to start around early October.

## CV TROPICALS

**Hass Avocados** from Mexico are inching higher in price as we head into the third week of September. Volumes have been steady, but there's been excellent demand for Mexican fruit despite the solid volumes of Peruvian fruit.

There is clearly a split market between the Mexican and Peruvian fruit, so be on the lookout for outstanding promotional opportunities on Peruvian fruit. We will have plenty of volume to offer deals with on Peruvian 32's and 48's. Quality is nice on both options.

**Pineapples** will be in excellent supply heading into October. Sizing remains strong with 6ct and 7ct, and 8ct are also available in less volume.

Continue to promote the Del Monte's **HoneyGlow Pineapples** for the remainder of the month. Sizing is extra large with most fruit being 5ct. Now is a great time to promote Pineapples especially with the strong eating quality.

**Mangos** will be in tighter supply as we head into October. Mexico has basically finished for the season, and we've made the transition to new crop Brazilian fruit. We now have this new crop fruit inhouse, and the quality is excellent. We're carrying Tommy Atkins variety with a mix of sizes – 9, 10, and 12 ct.

# PUMPKINS & FALL ORNAMENTALS
